

You shoot a lot and your gun gets hot. Then, without thinking about it, you put your rifle into its case or some place else equally tender.

We have mauled several rifle cases, burned seats in the car or truck, and have at least one burn scar from doing exactly this. This is why we created the jalapeño.

We made the original Jalapeño for the Minigun. With it, we could dump 3000 rounds in a minute or so, slip The Jalapeño over the barrel group, pull the gun off the mount and stow it right away. If it works for the Minigun (M134D), it will work on anything. Once inside the Jalapeño, your rifle can be safely stowed in its gun case.

The Jalapeño has a large mouth that makes sliding a hot rifle in easy and is sized to handle standard length or shorter rifles with suppressors.

The Dillon Rifle Company Jalapeño can handle temperatures beyond Minigun hot and look good doing it too.

Product Features:

23.5 in. (l) x 8 in. (w)

4 Color Options- Green, Black, Grey, FDE

Felted Carbon Fabric capable of Resisting Super Hot Temps.

Custom DRC Premium Jacquard Woven Nylon Webbing

Fidlock® slider-buckle.

THE BAG

Messenger Bag

The design is based on decades of field work in not so friendly places in the world where your bag is your lifeline. This bag is ready for anything, anytime, and anywhere.

Other bags have a lid that exposes everything you're carrying when you open the bag. We designed our bag to keep your gear organized and concealed.

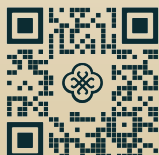

The main compartment or the "hot" side is lined with hook and loop system to keep your tools where you need them even when you're on the run. The "hot" side also has a zippered pouch for a custom Level 3A armor panel.

Product Features:

- 15" L x 5" W x 10" H
- 500D and Hypalon Construction
- Adaptable system
- Everyday Carry Bag
- Quick access to interior
- Keep contents organized
- Available in 4 colors: black, green, grey, and FDE.
- Inserts sold separately

The "cold" section also has hook and loop system in case you need to expand your load out. It has 4 additional stretchy pouches that you can organize with individual small pouches. The outer admin section is a great place to keep all your pens, pencils, cords and smaller items contained.

We offer the bag only, or as a system with rifle and pistol magazine pouches, medical pouch, and Level 3A armor panel.

DILLON

RIFLE COMPANY

The Range Bucket was originally designed for use in Aerial precision live-fire exercises from helicopters. It has since been adapted for use in various range environments. It is the range bag that can do it all, collect brass, hold your mags empty or full, store tools and carry tactical gear that you need for the range.

Featuring high quality waterproof, laminated cotton exterior with a large side pocket to hold your eye and ear pro. The elastic outer band holds five 30-round AR mags and 3 pistol mags. Made with a soft (4-stretch nylon) top for easy access to drop empty mags inside and at the same time prevent it from spilling out.

Coated webbing daisy chain around the base for multiple lashing points to secure your Range Bucket anywhere. Topped off with a padded static line rope handle for carrying comfort, you really can't go wrong with this high quality crafted product.

Product Features:

11 in. (diameter) x 14 in. (h)

4 Color Options- Green, Black, Grey, FDE

Custom DRC Premium Jacquard Woven Nylon Webbing

5 Outer Elastic AR Mag Slots

3 Outer Elastic Pistol Mag Slots

Surrounding Daisy Chain Base for Easy Lashing

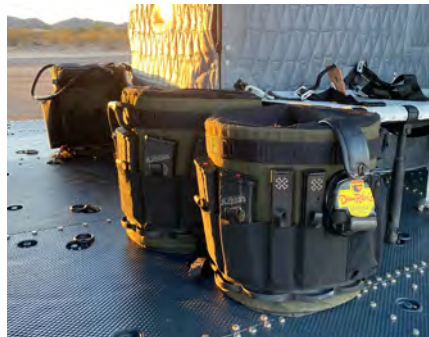

Padded Static Line Rope Handle

Outer Stretch Pocket

Easy Access Soft Top

No Bucket Needed. Stands Alone.

Manufactured using additive DMSLS technology (a.k.a. 3-D Printing), the Dillon Rifle Company 50 BMG suppressor employs patented Purposely Induced Porosity (PIP); a variable metal foam structure that allows gas and pressure to bleed off in locations and at rates of our choosing.

This allows a multitude of alternate flow routes for the excess of muzzle gases produced with the high-pressure gas of the 50 BMG cartridge while not only in signature reduction, but also aids in reduction of hazards associated with suppressed weapon operation to the shooter.

The internal structures and DMSLS technology allow the DRC 50 suppressor to have an extremely high strength-to-weight ratio without sacrificing any aspect of its signature reduction capabilities.

Product Features:

- PIP Technology
(Purposely Induced Porosity)
- Hub Adapter

Weight	2.6 lbs
Weight (with adapter)	2.7 lbs
Diameter	2.625 in
Length	11.75 in
Sound Reduction	-33.0db
Material	Titanium

NOTE: Not HUB compatible. It has a thread adapter to 1"-14 threads.

Dillon TAC 501 Rifle (De-linked BMG M33 ball)

Numbers are 3 shot averages, muzzle measurements are one meter to left per MIL STD 1474E, shooters ear was measured 6 inches to the right of shooters head.

Unsuppressed:

Muzzle: 177.4db
Shooters Ear: 174.2db

Dillon Rifle .50 Cal Suppressor:

Muzzle: 144.4db (-33.0db)
Shooter's Ear: 133.2db (-41.0 db)

Manufactured using additive DMSLS technology (a.k.a. 3-D Printing), the Dillon Rifle Company 5.56 suppressor employs patented Purposely Induced Porosity (PIP); a variable metal foam structure that allows gas and pressure to bleed off in locations and at rates of our choosing.

This allows a multitude of alternate flow routes for the excess of muzzle gases produced with the high-pressure gas of the 5.56x45 cartridge while not only in signature reduction, but also aids in reduction of hazards associated with suppressed weapon operation to the shooter.

The internal structures and DMLS technology allow the DRC 5.56 suppressor to have an extremely high strength-to-weight ratio without sacrificing any aspect of its signature reduction capabilities.

Product Features:

- PIP Technology
- Hub Adapter
- 3D Printed Inconel 718

Weight	.93lbs (15 oz)
Weight (with adapter)	1.05lbs (16.8oz)
Diameter	1.75 in 4.445 cm
Length	5.4 in 13.716 cm
Sound Reduction	-35.4dB(A)
Material	Inconel 718

NOTE: Threaded adaptor is 1/2"-28 but is HUB compliant and can accept any HUB compliant adaptor. We do not currently offer other adaptors.

Geissele 10.3" Rifle (5.56 M855 ball)

Unsuppressed:

Muzzle: 168.8db
Shooters Ear: 159.1db

Dillon Rifle Co. Suppressor:

Muzzle: 133.4db (-35.4db)
Shooter's Ear: 137.4db (-21.7db)

The Dillon Rifle Company TAC 301 rifle provides the tactical and competitive shooter with a professional grade rifle. The TAC 301 rifle system is a straight taper barrel, manually operated, detachable magazine with five shot capacity. It is fitted with a MDT Chassis, equipped with adjustable comb height and length of pull.

The system utilizes a Remington 700 style trigger set to 4 lbs with a top safety. The 20" barrel is a match grade stainless steel barrel with a 1 in 10 twist. The barreled action comes with a black Nitride finish. The TAC 301 rifle system is capable of shooting sub-MOA accuracy with a trained marksman and match grade ammunition.

Magazine	AICS 5 Round
Finish	Cerakote Metal Finish to Match Stock

The TAC 501 is a purpose built long range rifle. It is chambered in 50 BMG the largest round a civilian can own without a permit (in most states). Built on the legendary McMillan TAC 50 legacy which has the record for the longest engagement by a Canadian special operations team.

The TAC 501 rifle system is a chrome vanadium barrel with cut rifling, manually operated, detachable box magazine with five +1 shot capacity. The 27.5" barrel is a match grade stainless steel barrel with a 1 in 15 twist.

The barreled action comes with a black nitride finish with a nickel finish bolt. The rifle utilizes a Remington 700 style trigger set to 4.5 lbs. featuring a bottom safety.

It is fitted with a Cadex chassis providing strength, and durability. Equipped with an adjustable length of pull and cheek rest. Including a rear rake side baffle muzzle brake to help manage recoil and provide shooter comfort. The rifle rests on a B&T heavy duty Atlas bipod.

The TAC 501 rifle is capable of shooting sub-MOA accuracy with a trained marksman and match grade ammunition.
